

NAGARAJA ACHARYA

Robotics & Automation Engineering Student | Web Development Lead | Founder | Graphic Designer

Mangalore, Karnataka, India | [linkedin.com/in/nagaraja-acharya](https://www.linkedin.com/in/nagaraja-acharya) | nagarajaacharya.site

PROFESSIONAL SUMMARY

Motivated Robotics and Automation Engineering student with hands-on experience in robotics, embedded systems, web development, and digital product design. Currently serving as Web Development Lead and Graphic Designer at Samvada Communication, delivering 10+ client websites across diverse industries. Founder of Namma Designs, providing end-to-end web development and branding services. Demonstrated ability to build production-ready software products, IoT solutions, and automation projects that solve real-world problems. Combines engineering precision with creative execution to deliver impactful digital experiences.

WORK EXPERIENCE

Web Development Lead & Graphic Designer

May 2025 – Present

Samvada Communication, Udupi

- Lead end-to-end design and development of client websites, delivering 10+ production-ready websites across business, portfolio, and e-commerce domains.
- Architect responsive, mobile-first websites using HTML5, CSS3, and JavaScript, achieving consistent cross-browser compatibility and performance standards.
- Consult directly with clients to gather requirements, define project scope, and translate business goals into functional web solutions.
- Produce graphic design assets for digital marketing campaigns including social media creatives, promotional posters, and brand presentations.
- Manage ongoing website maintenance, content updates, SEO optimization, and performance improvements post-launch.

Founder & Creative Director

May 2025 – Present

Namma Designs (Self-Founded Startup), Kundapura

- Founded and operate a creative and digital solutions startup delivering web development, branding, and marketing services to businesses and professionals.
- Design and develop custom websites and visual identities, managing full project lifecycle from client onboarding to final delivery.
- Build scalable digital products and marketing assets; oversee client communication, project timelines, and quality assurance.

INTERNSHIP EXPERIENCE

Robotics Engineering Intern

2024

Technical Career Education Pvt. Ltd.

Project: Agricultural Field Monitoring Robot (AgroTrack)

- Developed an autonomous agricultural monitoring robot integrating environmental sensors for real-time field data collection.
- Implemented hardware-software integration using Arduino microcontrollers and sensor modules for temperature, humidity, and soil condition monitoring.
- Contributed to automation logic enabling continuous field monitoring with minimal manual intervention.

IoT & Web Development Intern

2024

Technical Career Education Pvt. Ltd.

Project: Public Stampede Control System Using IoT and Real-Time Web Dashboard

- Built an IoT-based crowd density monitoring system using sensors integrated with a real-time web dashboard for live data visualization.
- Developed the front-end dashboard interface for live reporting, alerting, and monitoring of crowd data streams.
- Integrated sensor hardware with web technologies, enabling real-time data pipeline from physical devices to browser-based interface.

PROJECTS

PumpMate – Fuel Station Management System | HTML, CSS, JavaScript, PHP, MySQL

- Designed and developed a full-stack fuel station management platform handling daily pump readings, fuel sales calculations, vehicle management, and expense tracking.
- Implemented automated salary calculations, customer management, and analytics dashboard, reducing manual administrative work for station operators.
- Architected a complete database schema in MySQL with PHP back-end, enabling reliable multi-module data management.

HelpMeBro – Student Academic Support Platform | HTML, CSS, JavaScript

- Built a student-focused web platform providing academic resources, technical guidance, and study support tools for engineering and science students.
- Designed an intuitive interface with categorized study materials and productivity utilities optimized for student workflows.

QuickTools – Online Productivity Utilities Platform | HTML, CSS, JavaScript

- Created a browser-based utility platform offering educational tools, productivity calculators, and quick-access tools — all client-side with zero-dependency execution.

Personal Portfolio Website | HTML, CSS, JavaScript

- Developed a professional portfolio site showcasing projects, services, certifications, and achievements; deployed at [nagarajaacharya.site](#).

TECHNICAL SKILLS

Web Development: HTML5 | CSS3 | JavaScript | PHP | MySQL | Responsive Design | UI/UX Fundamentals | Website Optimization

Robotics & Embedded: Arduino | Raspberry Pi | Embedded Systems | IoT Systems | Sensors & Actuators | Automation Systems

Design & Creative: Graphic Design | Adobe Photoshop | Canva | Branding Design | Social Media Design | Presentation Design

Software & Tools: Git | Microsoft Office | Google Workspace | Technical Documentation

CERTIFICATIONS

Technology Job Simulation	Deloitte Australia – Forage 2025
Mastering HTML5: From Beginner to Advanced	Udemy 2025
Learn Basics of Adobe Photoshop CC	Udemy 2025
GenAI Cybersecurity Solutions	Udemy 2024
Graphic Design Essentials	Canva Design School 2024
Canva Essentials	Canva Design School 2024
Basics of Python	Infosys Springboard 2024

EDUCATION

Bachelor of Engineering – Robotics & Automation Engineering 2024 – Present

Sahyadri College of Engineering & Management (SCEM), Mangalore

- Currently completing 4th Semester, progressing to 5th Semester.
- Relevant Coursework: Robotics, Automation Systems, Embedded Systems, IoT, Sensors & Instrumentation, Arduino, Raspberry Pi, Web Technologies, Programming Fundamentals.

Pre-University Course (Science – PCMB) 2022 – 2024

Government Pre-University College, Kundapura

KEY ACHIEVEMENTS

- Delivered 10+ client websites as Web Development Lead, managing full project scope from requirements to deployment.
- Founded Namma Designs, a creative and digital solutions startup, at the age of 20 while pursuing a full-time engineering degree.

- Built PumpMate, a production-grade multi-module fuel station management system, as an independent full-stack development project.
- Completed robotics and IoT internship projects including an agricultural monitoring robot and a real-time crowd management system.
- Earned 7 industry-recognized certifications spanning web development, design, AI, and software engineering.
